Text:

- 1 The European Students' Union raises its voice against the discriminatory
2 application processes in the German Association Uni-Assist.
- 3 Uni-Assist was founded by German Higher Education Institutes to manage
4 the applications of non-EU students to German Higher Education Institutes.
5 The idea behind this was to make the application process as simple as
6 possible. Instead the costs to run the organization have been redistributed
7 among all non-EU applicants. They are forced to pay an application fee to
8 get their application submitted to the Higher Education Institutes. Since the
9 introduction of Uni-Assist the fees for application are raising constantly.
10 ESU is outraged that the higher education institutes are externalizing their
11 administration costs on non-EU students and urges the higher education
12 institutes to offer a free of cost admission process for all students.
