Text:

1 ESU calls upon the Dutch government not to persist with its
 2 experiments to privatise part-time education. The participation levels
 3 in part-time education in The Netherlands have been decreasing for
 4 the past ten years. Now, experiments are being prepared to have
 5 part-time of education removed from public funding. With this move,
 6 the responsibility for the equal access to education is removed from
 7 the government and student representation within part-time
 8 education. Higher education is a public good and should therefore be
 9 a public responsibility. Part-time education should be equally
 10 accessible to all students in line with the Life Long Learning
 11 programme.
