Skopje, Macedonia

Subject: Support letter for Icelandic students

Students from Macedonia stands in solidarity with our colleagues from Iceland and support strongly their Students Representatives in all of Iceland. We strongly support their fight against the latest governmental changes which will lead to big problems in education of the students. Students are the basic, the future of every society because of that we think that this change will not lead to progress in the education process. Through all this years we, as member of ESU, together across all the Europe are fighting for the students and for their rights. For the reason that of that experience and all the changes in all the education politics of different governments across the country we have many arguments that this will not lead to success.

Because of all this, we, National student union of Macedonia support the Icelandic students and ask that this change not be realized.
